

**SuperTrouper™ Velvet White Carnation**

*Dianthus caryophyllus 'SuperTrouper Velvet White'*

Height: 10 inches

Spread: 12 inches

Spacing: 8 inches

Sunlight:

Hardiness Zone: 6b

Group/Class: SuperTrouper Series

**Description:**

Dramatic pink blooms with deep burgundy centers and airy white, ruffled petal edges, bloom consistently over a long season, especially in warmer climates; great for border fronts, containers, and floral arrangements

**Ornamental Features**

SuperTrouper Velvet White Carnation has masses of beautiful fragrant double pink frilly flowers with burgundy eyes and white edges at the ends of the stems from late spring to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive narrow leaves remain grayish green in colour throughout the year.

**Landscape Attributes**

SuperTrouper Velvet White Carnation is an herbaceous evergreen perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

SuperTrouper Velvet White Carnation is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

### **Planting & Growing**

SuperTrouper Velvet White Carnation will grow to be about 8 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

SuperTrouper Velvet White Carnation is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
