

Lakeview Mugo Pine

Pinus mugo 'Lakeview'

Height: 6 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 2b

Other Names: Mugho Pine, Swiss Mountain Pine

Description:

A dwarf selection featuring a dense, compact, pyramidal habit of growth; slow growing, rugged and hardy, excellent for form, texture and color detail in home gardens, can be kept quite small with judicious pruning; needs full sun

Ornamental Features

Lakeview Mugo Pine is a dwarf conifer which is primarily valued in the landscape or garden for its distinctively pyramidal habit of growth. It has emerald green foliage with hints of silver. The needles remain emerald green throughout the winter.

Landscape Attributes

Lakeview Mugo Pine is a dense multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Lakeview Mugo Pine is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Lakeview Mugo Pine will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
