

Primo® Pistachio Ambrosia Coral Bells

Heuchera 'Pistachio Ambrosia'

Plant Height: 10 inches

Flower Height: 22 inches

Spread: 32 inches

Spacing: 26 inches

Sunlight:

Hardiness Zone: 4a

Other Names: Coralbells, Alumroot

Group/Class: Primo Series

Description:

Large, well rounded chartreuse leaves create dense, robust mounds of foliage with tall flower scapes rising above; long blooming pink, bell flowers; thrives in partially shaded garden beds, borders and containers

Ornamental Features

Primo Pistachio Ambrosia Coral Bells features dainty spikes of rose bell-shaped flowers with shell pink overtones rising above the foliage from early to late summer. Its attractive crinkled lobed leaves remain chartreuse in colour throughout the year.

Landscape Attributes

Primo Pistachio Ambrosia Coral Bells is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Primo Pistachio Ambrosia Coral Bells is recommended for the following landscape applications;

Planting & Growing

Primo Pistachio Ambrosia Coral Bells will grow to be about 10 inches tall at maturity extending to 22 inches tall with the flowers, with a spread of 32 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 26 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant performs well in both full sun and full shade. However, you may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Primo Pistachio Ambrosia Coral Bells is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
